Subject Re: Schedule for Site Wide Remedy Decision for Pickett
District Road, New Milford. CT

RDMS DocID 107854

Bob,

Thanks very much for sending this schedule.

Based on the schedule and our discussion a month or so ago, my understanding is that a site-wide RAP for the site was public noticed in 2004 and that the air sparge/SVE system is expected to be the site-wide remedy (i.e., while there may be some adjustments to the system, no other remedial systems are expected to be brought on-line). If this is correct, we would record the remedy decision and construction complete determination once it is demonstrated that ecological risks have been addressed at the site or will be adequately addressed by the air sparge/SVE system during the operation and monitoring phase. As a first step toward evaluating ecological risks at the site, please send EPA and DEP the completed Ecological Receptor Exposure Pathway Scoping Checklist for the site by April 6th as requested in our January 6th letter.

Thanks very much Bob. I hope all is well with you, Stephanie
